Profile Summary

Unity game developer focused on building playable experiences through gameplay prototyping and core mechanics design. Experienced in developing interactive projects with attention to player feedback, clarity, and user experience. Strong interest in learning through experimentation, iteration, and real world development challenges.

Technical & Design Skills

Game Development: Unity, Gameplay Prototyping, Core Mechanics Design

Programming: C# (Basic–Intermediate)

Game & UX Design:

Game Design Fundamentals, UX Research, User-Centered Design, Iterative Design

Selected Projects

Graduation Game | Unity

- Designed and developed a complete playable game as a graduation project, from concept to functional prototype.
- Focused on building clear gameplay mechanics and balancing challenge.
- Created a short gameplay trailer to communicate the core idea and overall feel of the game.

Gameplay Prototypes | Unity

- Developed multiple focused prototypes, each targeting a specific design or technical goal such as mechanics exploration, player feedback, UI clarity, or interaction flow.
- Used rapid prototyping to test ideas quickly and reflect on how design decisions affect player understanding and engagement.
- Documented learnings from each prototype to guide future improvements and design choices.

Additional Experience

English Instructor – CAC Academy (7 months)

Taught English to adults and teenagers across multiple levels, from absolute beginner (Level 0) to advanced. Provided personalised guidance and adapted teaching methods to suit diverse learning needs.

Education

Cairo University – Faculty of Computer Science and Artificial Intelligence (Expected Graduation: 2029)
